# MoA Clear Passage Funds™: The Clear Choice for Your Retirement Plans

The retirement marketplace has evolved throughout the years as new programs and investment products have become available to investors of all sizes. As savings plans have evolved from Social Security through today's 401(k) and 403(b) plans, and new products became available, Mutual of America has been there to support those plans. With our specialized approach to asset allocation and glidepath construction, the MoA Clear Passage Funds offer investors a simple and straightforward way to invest for their retirement.

## A 75-YEAR HISTORY OF Retirement Plan Management

At Mutual of America, we are proud to have participated along the journey. Founded in 1945, Mutual of America was one of the first companies to offer retirement programs to those not covered by Social Security. Today, we serve the investment needs of over 600,000 participants across various industries through the MoA family of mutual funds and Target Date Series.

## MoA Funds: Expertise Across an Array of Strategies

Mutual of America created its first mutual funds in 1985. Now, Mutual of America Capital Management manages an array of 29 mutual fund strategies that span domestic and international equities, fixed income and asset allocation through our Target Date Series and target risk allocation funds. With a team of over 20 investment professionals, we embrace active management in the small-cap, mid-cap, international equity, and fixed income asset classes where active management can provide additional value.

### THE MoA CLEAR PASSAGE FUNDS FEATURE:

- Time-tested investment management and allocation expertise
- Glidepaths that extend 10 years beyond the target date
- Conservative risk-management approach
- Lower expenses than many similar products<sup>2</sup>

Similarly, we leverage passive, or index management in large-cap equities where value is difficult to add. Our hybrid approach allows us to strike the right balance between potential alpha opportunity while maintaining a lower expense ratio. We manage portfolios with a common goal — to provide investors with attractive returns over time while being mindful of risk.

## Asset Allocation is in Our DNA

Our specialized approach to asset allocation sets us apart. Introduced in 2007, the MoA Clear Passage Funds enable investors to enjoy the advantages of a dynamic portfolio glidepath that adjusts the weighting of equities and fixed income holdings over time based on a target retirement year. We systematically manage risk through careful selection of asset classes and a conservative approach to each Fund's equity allocation. Diversification and minimizing volatility within our products are at the core of our investment philosophy.

Offered in five-year increments, these Funds have a glidepath that extends 10 years beyond the target year. After that 10-year period occurs, each Fund is merged into our MoA Retirement Income Fund which is designed to provide a continued stream of income to participants along with the potential for modest capital appreciation.

## Decades of Investment Experience Guide Each MoA Clear Passage Fund

Our team of experienced investment professionals are experts in assessing and evaluating the returns and correlations of various asset classes and their associated risks. This expertise provides the foundation for constructing the asset allocations of each MoA Clear Passage Fund.

With the MoA Clear Passage Funds, investors can confidently select a target retirement year and allow Mutual of America Capital Management to continuously manage the portfolio's allocation to help them achieve a successful retirement outcome.

**You should consider the investment objectives, risks, and charges and expenses of the funds carefully before investing. This and other information is contained in the funds' prospectuses and summary prospectuses, which can be obtained by calling 800.914.8716 or visiting moafunds.com. Read them carefully before investing.**

The target date set forth in each Retirement Fund's name is the approximate date that the fund expects investors to retire and begin withdrawing their account balance. There is no guarantee that a Retirement Fund will correctly predict market or economic conditions, and the value of a Retirement Fund is not guaranteed at any time. Principal loss is possible. The Retirement Fund is a "fund of funds" where the allocations shift and there is no guarantee that the allocations in the Retirement Fund will prove to be correct under all market and economic conditions. An investment in the Retirement Fund could decline in value, and you could lose money by investing in the Retirement Fund, even after the Target Retirement Date. There is no guarantee that the Fund will provide adequate income at and through your retirement.

Diversification cannot assure a profit or protect against loss in a down market. Alpha is a measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark is a fund's alpha.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

<sup>2</sup>The Gross Expense Ratio of each Fund is as follows: MURGX 0.48%, MURHX 0.45%, MURIX 0.43%, MURJX 0.40%, MURLX 0.37%, MURMX 0.36%, MURNX 0.36%, MUROX 0.37%, MURPX 0.39%, MURQX 0.50%, MURUX 11.96%/NET 0.36%, MARMX 0.54%. For MURUX, the Adviser has contractually agreed to waive its advisory fee and/or reimburse the Fund's ordinary operating expenses to the extent necessary to limit the ordinary operating expenses (other than, among other things, the management fee and shareholder servicing fees) to an amount not to exceed the annual rate of 0.08% based on the Fund's average daily net assets. This contractual obligation may not be terminated before April 30, 2026, without the consent of the Board of Directors.

MoA Funds distributed by Foreside Fund Services, LLC.

### 2024 Best Mixed-Assets Small Fund Family Group Over Three Years<sup>1</sup>

<sup>1</sup>Based on historical risk adjusted returns as of 11/30/2023. <sup>2</sup>Based on historical risk adjusted returns as of 11/30/2024. <sup>3</sup>Based on historical risk adjusted returns as of 11/30/2022.

The LSEG Lipper Fund Awards, granted annually, highlight funds and fund companies that have excelled in delivering consistently strong risk-adjusted performance relative to their peers. The LSEG Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is a risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the LSEG Lipper Fund Award. For more information, see [lipperfundawards.com](http://lipperfundawards.com). Although LSEG makes reasonable efforts to ensure the accuracy and reliability of the data contained herein, the accuracy is not guaranteed by LSEG Lipper.

Asset class group awards will be given to the best large and small groups separately. Large fund family groups with at least five equity, five bond, or three mixed-asset portfolios in the respective asset classes are eligible for a group award. Small fund family groups will need to have at least three distinct portfolios in one of the asset classes – equity, bond, or mixed-asset. The lowest average decile rank of the three years' Consistent Return measure of the eligible funds per asset class and group will determine the asset class group award winner over the three-year period. In cases of identical results, the lower average percentile rank will determine the winner.
